

HP NEOSYNTH GEN6 0W-20

SUPER PREMIUM QUALITY SYNTHETIC ENGINE OIL FOR MODERN BS VI PASSENGER CARS & SUVs

DESCRIPTION

HP NEOSYNTH GEN6 0W-20 grade is a super premium synthetic engine oil based on advanced Low SAPS additive technology to deliver excellent performance in modern cars running on Petrol /Diesel/CNG/Flex Fuel meeting BS VI emission norms.

Recommended for various models of BS VI compliant passenger cars of Tata Motors, Maruti-Suzuki, Hyundai Motors, Renault, Nissan, Datsun, Chevrolet, Toyota, BMW, GM and Ford, etc. running on Petrol /Diesel/CNG/Flex Fuel and requiring a SAE 0W-20 viscosity engine oil. Also recommended for PHEV & HEV type Electric Passenger Cars & SUVs.

FEATURES & BENEFITS

- Low SAPS technology for excellent after treatment compatibility
- Suitable for BS VI compliant passenger Cars/SUVs
- Also suitable for petrol engines equipped with GDI/TGDI technology
- Specifically designed to help prevent LSPI in TGDI engines
- Enhanced fuel efficiency
- Exceptional soot dispersancy to control oil thickening
- Superior engine cleanliness
- Superior control on wear
- Longer engine life

MEETS REQUIREMENTS OF

- API SP
- ACEA C5
- ILSAC GF-6

PHYSICO-CHEMICAL PROPERTIES (TYPICAL)

Kinematic Viscosity @ 100°C, cSt	8.1
CCS Viscosity, cP	5420@ -35°C
Viscosity Index	155
Flash Point, COC, °C	200
Pour Point, °C	-45
